Who We Are:

ROEDER WINDOWS & DOORS is proud to bring German quality windows and doors to the U.S. market. We look back at over 140 years of family carpentry craftsmanship with a dedication to:

- Creative and Flexible Design
- Highest Quality Production
- Environmentally Friendly Operations

History:

We first came to the U.S. in 2000 and have since delivered a variety of products to some of the finest homes in North America. Our customers have chosen unique wood species and some of the finest cladding materials for their windows and doors. We offer highest levels in customization of sizes, shapes, design and finishes to match customer expectations and architectural designs.

Roeder Windows & Doors initially established its U.S. presence through distribution partners. In 2008 we decided to go one step further in the commitment to our U.S. customers and opened up our own subsidiary in Ventura, California.

Our high quality custom windows and doors provide a combination of European quality and craftsmanship. Having locations both in Germany and California allows us to give our customers the German quality they expect and the exceptional customer service and technical support they deserve.

Green Production:

Being located in a rural area in Germany surrounded by forest and farmland has kept Roeder Windows & Doors in touch with environmental responsibility as a manufacturing company. We continuously invest in our operations to reduce its impact on the environment, currently including:

- Purchasing our wood from well managed, sustainable forest operations
- Using solar panels to support our factory's energy needs
- Recycling our wood shavings as fuel for our heating system in the manufacturing shop
- Apply water based stains to our products
- Using environmentally friendly adhesives

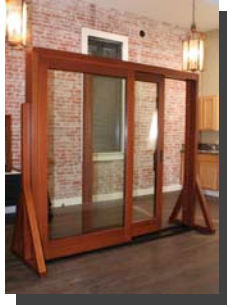

We aim at being at the forefront of sustainable manufacturing for windows and doors and will continue to invest accordingly.

Our Products

We specialize in the design and production of highest quality wood Windows and Doors with optional exterior metal cladding. Our portfolio includes:

- Tilt & Turn
- Lift & Slide
- Pocketing Doors
- Casement
- French
- Folding
- Entry Doors

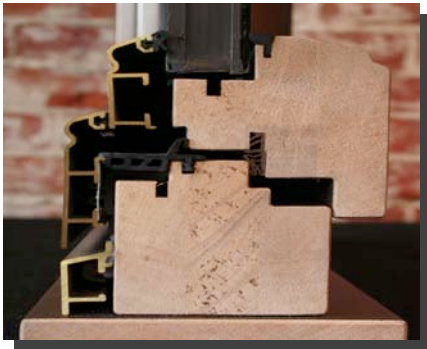

Our Services

We pride ourselves on excellent customer services from the first contact with our company all the way through to product maintenance.

Some of our services:

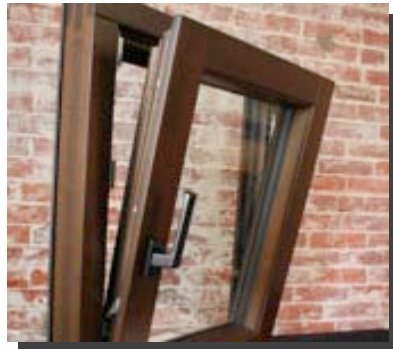

- U.S. based staff is trained at the German factory ensuring excellent product knowledge
- Sales Rep assistance during design process
- Detailed set of Shop Drawings provided with each project
- On-site installation workshop with detailed installation instructions and drawings

Construction

- **Mortise & Tenon joinery** (glued) in all corners ensures stability and durability
- **Ventilated cladding system** prevents moisture build-up between wood and cladding / unique fastening system
- **Insulated dual-pane glass** (standard = Soft Coat Low-E 6mm dual pane)
- **Tri-laminate wood structure** prevents warping
- **Concealed hinges** on in-swing and out-swing products / jointly developed by MACO and RÖDER
- **Multi-point (min. 5) locking mechanism** - seals tight & prevents warping; assuring long-term operational consistency

Operation

In-Swing Product

- **Tilt** function for efficient ventilation; including draft stop/lock
- **Turn** function for ease of cleaning and ease of egress

Out-Swing Product

- **Turn** function for ventilation and ease of egress; including friction stop
- **Tilt** function optional
- **Integrated roll-screen** optional

Finish

- **Environmentally conscious multi-step finishing process** completed at the factory prior to hardware, clad and glass installation; ensuring 100% protection of all surfaces
- **Wood finish color** completely customizable
- **Italian bronze cladding** with hand-applied antique finish
- **Powder-coated aluminum** cladding in customized colors
- **Welded and polished miter joints** (same on bronze and aluminum cladding)
